Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-18, drawn to an enclosure, classified in class 182, subclass 129.
- II. Claims 19 and 20, drawn to a method of erecting an enclosure, classified in class 182, subclass 178.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used without the process of mounting a first continuous profile to a first vertical member of a scaffold frame.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
